

A-E1 Wrist Strap with Ground Sensor

Light and sound warn the worker when a ground defect occurs less

A low battery LED illuminates when the battery charge drops to 20% or

A-E1 ESD Wrist Strap is designed to be an onsite guide for controlling work and reducing defects when used in general work environments and by device operators. A unique blinking LED indicator as well as a high octave audible alarm sound alerts the operator of a cord break, loose pin jacks, or other ground defects. Additionally, the built-in LED and audible alarm will notify the technician of low battery life when it reaches below 20%. These special built-in alarms help managers and supervisors to achieve “zero” defects on the assembly floor.

Specification

- **Conductive Rubber Band**
- **Sensitivity Adjustment Trimmer for Checking Poor Ground**
- **Long-Life Battery (Approximately 500 / 8hr. Work Days)**
- **ESD Long 6' Cord with Alligator Clip**
- **Built-in 1M Ω Resistor**
- **Easy "On/Off" Switch**
